To Whom it May Concern:

I would like to take the initiative to give my recommendation for choosing Agri-Systems, Inc. for any of your construction needs.

We recently completed a large grain storage expansion at our facility and chose to work with Agri-Systems because of their professionalism, competitiveness and quality of products offered.

From the beginning stages of the project they took the time to survey our site, do detailed drawings and design a system that offered us the most value. Throughout the construction process we continued to be impressed with the professionalism and quality of work. Their attention to detail was apparent throughout and they paid attention to things such as keeping a clean jobsite, communicating with us on the project, and helping with the start up. All the construction crews from the soil correction, concrete, bin erection, and finally the millwrights performed high quality work and were very efficient.

Agri-Systems not only got our project completed on time, but it was ahead of schedule! We are glad we had the opportunity to work with them and would highly recommend them for your next grain storage or handling project.

Sincerely,

A handwritten signature in black ink that reads 'Mark Pederson' with a long horizontal flourish extending to the right.
